#### **DETAILED ACTION**

## Specification

The abstract of the disclosure is objected to because it lists the reference numbers for the drivers as "(TI, T2)" which should be -- (T1, T2) --. Correction is required. See MPEP § 608.01(b).

### Claim Objections

Claims 3 and 4 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must refer to other claims in the alternative only.

See MPEP § 608.01(n). Accordingly, the claims 3 and 4 not been further treated on the merits.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dyer (US 4,321,975). Dyer discloses a drill head for a drilling machine characterized in that it comprises a protective screen (12) for conveying the drilling mud discharged from the drivers of the sleeves and drill rods (14, 19; col. 1, lines 46+), and wherein the

Application/Control Number: 10/598,787

Art Unit: 3672

screen reduces the mud fallout area in the vicinity of the drilling zone (col. 1, lines 46+); wherein the screen panel has a cross section as to cover wholly at least three sides around the area where the mud is discharged (figs 1 and 2).

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) and being clearly anticipated by Nittinger et al. (US 3,788,423). Nittinger et al. disclose a drill head for a drilling machine characterized in that it comprises a protective screen (14) for conveying the drilling mud discharged from the drivers of the sleeves and drill rods (col. 2, lines 17-20); and wherein the screen reduces the mud fallout area in the vicinity of the drilling zone; wherein the screen panel has a cross section as to cover wholly at least three sides around the area where the mud is discharged from the drivers of the rod and sleeve (fig 2).

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Martin et al. (US 2003/0213507) discloses a drilling shield which is moveably coupled to a drill head or drill stem.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Andrews whose telephone number is (571) 272-6558. The examiner can normally be reached on Monday-Thursday, 7:30am-5pm and alternate Fridays.

Application/Control Number: 10/598,787

Art Unit: 3672

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Bagnell can be reached on (571) 272-6999. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
